

BATTERY OPERATED SWEEPER TRUCK

A high-performance, eco-friendly sweeper designed for deep cleaning, durability, and effortless operation. Perfect for roads, industrial areas, and large public spaces.

ELECTRIC OPERATED SWEEPER TRUCK

The DTMS-2000 EV Sweeper is a powerful, battery-operated cleaning machine designed for efficient dust control in large areas. With advanced sweeping technology, strong suction, and an eco-friendly design, it ensures maximum cleaning performance with minimal maintenance.

Water Tank Capacity	900L	Cabin	2 Persons
Dust Tank Capacity	2000L	Control System	Easy Control
Sweeping Width	2400mm	Battery Capacity	36 kWh
Cleaning Efficiency (maximum)	2400m ² /hour	Charging Time	6–8 hours
Number of Brushes	4	Running Time	8–10 hours
Drive Motor Power	10 kW	Safety Features	Alarm, Front & Rear Warning Lights, Radar Safety System
Vacuum Motor Power	10 kW	Charging Cost (Approx.)	₹ 450
Maximum Sweeping Speed	10 km/h	In-built Jet Pressure Washer	130 bar
Maximum Drive Speed	25 km/h	Anti-Smog Water Spray System	Yes
Maximum Distance Covered (8 Hours)	80 km	Dumping Type	Hydraulic
Dumping Height	1 meter		

Efficient & Eco-Friendly Street Cleaning

An Advanced Electric Sweeper Truck DTMS-2000EV Designed for Smart Waste Collection, Sustainable Urban Cleanliness, and Maximum Operational Efficiency.

ELECTRIC OPERATED SWEEPER TRUCK DTMS-2000 EV:

The DTMS-1000 Electric Operated Sweeper Truck is designed for efficient street and urban cleaning. It operates using electric power, making it an eco-friendly alternative to traditional fuel-powered sweepers. Here's a breakdown of its main functions:

- **Street Sweeping:**

The DTMS-1000 EV uses rotating brushes (side brushes and a main brush) to sweep debris, dirt, and leaves from roads, sidewalks, and public spaces. These brushes push the debris toward the truck's central suction system.

- **Debris Collection and Suction:**

The truck is equipped with a powerful suction system that draws the swept debris into a large hopper (storage container). This suction system ensures that even smaller debris and dust particles are collected, leaving the surfaces cleaner.

- **Water Spraying for Dust Control:**

The sweeper is fitted with a water tank and sprays water during operation. This helps suppress dust and ensures that the debris is not scattered back onto the cleaned surface, promoting a dust-free environment.

- **Eco-Friendly Operation:**

Operating on electric power, the DTMS-1000 EV produces zero emissions, making it a sustainable choice for urban areas. It reduces air pollution, offering cleaner streets without the environmental impact of traditional diesel-powered sweepers.

- **Efficient Coverage:**

With a large cleaning width (up to 2.3 meters), the truck can clean large areas in a shorter time. It's designed to work efficiently in both wide open spaces and narrower streets, offering flexibility in urban environments.

- **High Cleaning Capacity:**

The DTMS-1000 EV can clean up to Large area per hour, making it suitable for large-scale urban cleaning operations.

Advanced Features Powerful Performance.

From precision brushing to high-power vacuuming – every detail of DTMS-1000 EV is built for next-level street cleaning.

High Pressure Water Gun

Spray Device

Side Brush and Vacuum Cleaner

Durable Rubber Tyres

Strong Vacuum Cleaner

High Density Edge Brush

The Ultimate Sweeping Solution for Cleaner Cities & Industries

The DTMS-2000 EV battery-operated sweeper is designed for heavy-duty cleaning in various public and industrial spaces. It ensures efficient dust and debris removal, making it ideal for:
