ELECTRIC OPERATED SWEEPER TRUCK

The DTMS-6000 EV Sweeper is a powerful, battery-operated cleaning machine designed for efficient dust control in large areas. With advanced sweeping technology, strong suction, and an eco-friendly design, it ensures maximum cleaning performance with minimal maintenance.

Clear Water Tank	1500L	Voltage	72V
Waste Dust Tank	6000L	Operator Cabin	2 Persons
Sweeping Width	3500mm	Working Time Per Charge	10-11 Hr
Suction Width	1500mm	Charging Time	8-9 Hr
In-Built Jet Pressure Washer	150Bar	Drive Motor Power	40Kw
Battery Capacity (Lithium)	260Kw	Size	6050x3250x3450mm

ELECTRIC OPERATED SWEEPER TRUCK DTMS-6000 EV:

The DTMS-6000 Electric Operated Sweeper Truck is designed for efficient street and urban cleaning. It operates using electric power, making it an eco-friendly alternative to traditional fuel-powered sweepers. Here's a breakdown of its main functions:

- **Street Sweeping:**

The DTMS-6000 EV uses rotating brushes (side brushes and a main brush) to sweep debris, dirt, and leaves from roads, sidewalks, and public spaces. These brushes push the debris toward the truck's central suction system.

- **Debris Collection and Suction:**

The truck is equipped with a powerful suction system that draws the swept debris into a large hopper (storage container). This suction system ensures that even smaller debris and dust particles are collected, leaving the surfaces cleaner.

- **Water Spraying for Dust Control:**

The sweeper is fitted with a water tank and sprays water during operation. This helps suppress dust and ensures that the debris is not scattered back onto the cleaned surface, promoting a dust-free environment.

- **Eco-Friendly Operation:**

Operating on electric power, the DTMS-6000 EV produces zero emissions, making it a sustainable choice for urban areas. It reduces air pollution, offering cleaner streets without the environmental impact of traditional diesel-powered sweepers.

- **Efficient Coverage:**

With a large cleaning width (up to 3 meters), the truck can clean large areas in a shorter time. It's designed to work efficiently in both wide open spaces and narrower streets, offering flexibility in urban environments.

- **High Cleaning Capacity:**

The DTMS-6000 EV can clean up to Large area per hour, making it suitable for large-scale urban cleaning operations.

The Ultimate Sweeping Solution for Cleaner Cities & Industries

The DTMS-6000 EV battery-operated sweeper is designed for heavy-duty cleaning in various public and industrial spaces. It ensures efficient dust and debris removal, making it ideal for:

Roads & Highways

Parking Lots

Airports

Industrial Areas

Commercial Complexes
